**Subject:** Chapter 312 Rule

Good Morning Brian

EAD has one comment regarding buffer zone requirements

There are two proposed language changes with regard to buffer zone requirements

- Immediately implement a 750 foot buffer zone when a school, business or residence is occupied within this distance
- Buffer zones apply only at time of issuance and do not change (these permits are usually issued every 10 years)

EAD suggests the language be written that if there is a documented nuisance, a change in buffer zones may be required by TCEQ.

If you have any questions please let me know.
